

Can any one think of shooting pigeon or sparrow?

With any edged weapon or pointed arrow?

Would you ever think of throwing stone at neighbour?

Do you think it worth to make futile labour?

No one attempts at without any purpose

Why don't you send stone in stead of rose?

Why we dislike displeasure and show through nose?

Threats are instantly eliminated before they pose

We can't afford to be guard off

Immediate steps to position and ward off

It is human nature not be little sluggish

Humble approach and not to talk rubbish

Are we creating impossible things to live?

Do we not aim higher and in goals believe

If answer is yes then think of always good

No retaliation even if beaten with wood

This may look strange and little funny

Greatness and nobility can't be achieved with money

No bees may store drops of honey

Still it happens and we don't raise bogey

Why all great souls laid down lives?

Were they all fools not to long survive?

What forced then to prefer death for life?

They had their own kingdom and beautiful wife

We may not go far but strive for best

Life is not worth to offer for test

Not to sit idle and not to go for rest

Strong resolve at heart and all cards to chest

I am not worthy to offer any solution

Peace should not face kind of dilution

Whole mankind may become extinct

If we not offer .....

What is good to inhale and what to exhale?

Leave that aside with resolve to excel

We may not follow and good ideas repeal

This is simple request or may be an appeal
